Mr. Gavin Batty (Managing Director)

THERMOSHIELD AUSTRALIA PTY LTD
15 PRICE ROAD,
KALORAMA. VIC. 3766

Ratray & Walker (Vic) Pty Ltd engaged the services of Thermoshield Australia Pty Ltd to apply their product to a section of roof above the offices and showroom at our premises at Peninsula Avenue, Rye. Vic. The total area was approximately 850 sq metres of galvanized tray deck roofing. The original roof was approximately 35 years old, and being in a coastal area, was in need of repair. We were contemplating total replacement.

After consultation with Gavin Batty we decided to apply "Thermoshield". This decision has effectively increased the life of the roof, eliminating the need to replace it, as well as creating superior insulation, which has been of great benefit. Since the application, we have experienced both summer and winter. The temperature change through both seasons has been quite noticeable, substantially reducing our energy costs. This change has been especially noticeable in our second storey office area, which was often prone to increased temperatures during hot periods.

We are delighted with the appearance of the product, its thermal benefits and the quality of workmanship during application. We thoroughly recommend this excellent product.

Yours Sincerely,

DEB CASPAR (Director)

MARK THOMSON (Director)
